CRUX

OUTSIDE-THE-WAISTBAND DOUBLE MAG POUCH

FEATURES

The **CRUX** is a concealment double magazine pouch for belt carry. Carrying two magazines outside the waistband comes down to how close the pouch holds them to the body and whether the belt attachment holds up over years of carry. The CRUX is built for both.

DURABLE DESIGN: Proprietary 1.5” belt loops are built to endure 700 pounds of pull force. A molded ridge in the shell strengthens the pouch without adding bulk.

RETENTION ADJUSTMENT: Front and rear magazine retention can be adjusted separately.

DESIGNED FOR CONCEALMENT: The combination of a curved pouch with angled wings and belt loops, secure the magazines tight to the body.

FIT: 1.5" belts. Left and right hand options.
